

# Work Better Together

At Stormboard we believe that employee engagement and the exchange of ideas shouldn't have to start or stop within the confines of the boardroom. Transform your traditional meetings into interactive, collaborative, and intentional processes that actually get work done.

## Hold shorter and fewer meetings

Prepare and provide context ahead of time so your meetings are intentional, shorter, and efficient. Make sure everything is captured and assigned after one meeting.

## Get results faster

Collaborate with your team when you need to, from anywhere, without requiring everyone to be in the same room or trying to get things done over a call.

## Keep your ideas secure

Whiteboards with P.L.O. written on them are not secure. With Stormboard, your ideas are transmitted over a 256 bit SSL (bank grade) Internet connection and your work is accessible by invite only.

## Create high-performing virtual teams

Create a culture of collaboration that gets things done – teams, no matter where they are located, can hold meetings and make decisions quickly.

## Streamline your business processes

Use one of hundreds of built-in templates for processes like Agile, Product Management, Design Thinking, and more. Custom templates are also available.

## Work on any device

Access Stormboard on screens from 4" to 85" on any device – no downloads or additional software is required.

## Create reports instantly

No more hastily typing meeting minutes, taking blurry photos of whiteboards, or rolling up flipcharts and losing great ideas forever – instantly export your content into Microsoft Word, PPT, or Excel; Google Docs, Sheets, or Slides; and more!

## Never miss a good idea again

Stormboard can be used during a meeting or on your own time. Ongoing projects can evolve from simple concepts to real-world solutions, content can be voted on quickly without having to disrupt workflow, and questions can be seamlessly asked and answered.

## Keep everything in one place

Stormboard is a secure virtual workspace where you can keep documents, ideas, notes, videos, photos, diagrams, charts and more so it is easy to access when making decisions, getting updates, and assigning work.
